

## **IntelliTools Classroom Suite 3 Advanced Workshop**

In this workshop, participants will explore advanced features within IntelliTools Classroom Suite. Advanced workshop participants **must** have completed the beginner and intermediate workshops for IntelliTools Classroom Suites prior to signing up for this course. It is also recommended that participants be active users of the technology.

Instruction and opportunities to explore, design, and create custom activities will be provided. Scanners and printers will be provided for developing custom overlays to take home. Participants should bring classroom materials to assist in creating activities (digital pictures of students, books, etc.). If time allows, participants may also have the opportunity to have a sneak peak at the new IntelliTools Classroom Suite 4.

**Presenters: Jill Ethridge, OTR/L & Janie Cirlot-New, M.S., CCC-SLP**
