In this workshop, participants will be introduced to the simplicity and power of IntelliTools Classroom Suite. This award-winning set of tools includes IntelliTalk 3, a word processor with auditory and graphic support, IntelliMathics 3, an on-screen math manipulative program, and IntelliPics Studio 3, a multimedia tool. These programs are intended for both student and teacher use, across grade levels and curricula. Classroom Suite is an ideal software choice for supporting differentiation of instruction and inclusion.

Workshop participants will investigate the integrated environment of the three programs, see the ease of assessing student performance and demonstrating progress, and explore the activities and templates included with the software. Participants will be introduced to Intellikeys alternative keyboard functions and settings.

**Presenters:** Jill Ethridge, OTR/L & Janie Cirlot-New, M.S., CCC-SLP

**March 28 & 29, 2007**
8:00 a.m. – 3:30 p.m.
